Profile Summary

Electronics and Telecommunication Engineering graduate with hands-on experience in Python, SQL, troubleshooting, workflow validation, and technical documentation. Experienced in investigating technical issues, validating structured data, preparing operational reports, and supporting effective issue resolution. Strong analytical mindset with the ability to debug workflows, analyze complex problems, and communicate technical information effectively to technical and non-technical stakeholders. Seeking to build a long-term career in Technical Support and Operations by delivering reliable issue resolution, continuous process improvement, and exceptional customer support.

Technical Skills

Programming: Python, SQL

Database: SQL Querying, Database Analysis, Data Validation

Data Visualization: Power BI, Microsoft Excel

Tools: Git, GitHub, Visual Studio Code, Jupyter Notebook

Technical Support: Troubleshooting, Debugging, Root Cause Analysis, Incident Investigation, Workflow Validation

Documentation: Technical Documentation, Knowledge Base Documentation

Core Competencies: Analytical Thinking, Problem Solving, Customer Support, Technical Communication, Cross-functional Collaboration

Experience

Sales Support Executive

Nov 2025 – Feb 2026

Profecyma

- Provided customer support through phone, email, and CRM by resolving customer queries, ensuring timely issue resolution, and maintaining high service quality.
- Investigated customer-reported issues, coordinated with internal teams, and tracked requests through successful resolution while adhering to SLA commitments.
- Maintained accurate customer records, support documentation, operational reports, and activity logs to ensure process accuracy and audit readiness.
- Performed data verification, report validation, and Excel-based operational tracking to support daily business operations and decision-making.
- Communicated technical and process-related information effectively to customers and internal stakeholders, ensuring regular status updates and effective issue resolution.
- Identified recurring customer issues, documented observations, and shared process improvement recommendations to enhance support efficiency.
- Delivered consistent customer support by managing multiple concurrent requests in a fast-paced, high-pressure environment while maintaining accurate documentation and high service quality.

Machine Learning Intern

Aug 2022 – Aug 2023

BitMap Technology

- Cleaned, validated, and preprocessed structured datasets using Python to improve data quality and support analytical workflows.
- Developed SQL queries for data extraction, validation, and analysis to verify datasets, identify inconsistencies, and support troubleshooting activities.
- Executed workflow testing and debugged Python-based analytical processes by identifying data inconsistencies and process anomalies.
- Investigated analytical issues, identified underlying causes, documented observations, and collaborated with mentors to implement corrective actions.
- Prepared technical documentation, project reports, and knowledge-sharing materials to support issue resolution and project delivery.
- Built operational dashboards and analytical reports using Power BI and Excel to communicate project insights to stakeholders.
- Collaborated with cross-functional team members to resolve project issues, validate deliverables, and ensure timely completion of assigned tasks.
- Supported continuous process improvement by identifying workflow bottlenecks, recommending efficiency improvements, and maintaining documentation standards.

Education

B.E. Electronics and Telecommunication Engineering

2023

Dr. D. Y. Patil Institute of Engineering, Pune

CGPA: 7.5/10

Projects

IncidentIQ – Production Incident Investigation System (Python — SQL — PostgreSQL)

- Designed and implemented a production incident investigation system to analyze failed transactions, duplicate records, and operational anomalies using SQL and Python.
- Applied structured root cause analysis techniques to identify recurring issues and recommend corrective actions for operational stability.
- Validated relational database records, automated incident reporting, and documented investigation findings to improve troubleshooting efficiency.
- Developed investigation workflows, issue resolution procedures, and operational best practices to improve support efficiency and future incident handling.

LogInsight – Python Log Analyzer (Python — Pandas — Regex)

- Designed and implemented an automated log analysis solution to parse application logs, classify system events, and accelerate technical troubleshooting.
- Automated detection of recurring application failures, generated operational summaries, and identified error trends to accelerate issue diagnosis.
- Generated detailed incident reports highlighting exception frequency, error trends, and recurring failures to support root cause investigation.
- Documented log analysis workflows and troubleshooting procedures to support knowledge sharing and future issue investigations.

SupportPulse – Ticket Analytics Dashboard (SQL — Power BI — Excel)

- Designed an operational support dashboard to monitor SLA compliance, ticket resolution trends, escalation metrics, and service performance.
- Analyzed support ticket data to identify recurring customer issues, resolution bottlenecks, and opportunities for process improvement.
- Generated operational reports and visualizations to support decision-making, workload tracking, and customer support performance monitoring.
- Documented dashboard metrics, reporting workflows, and business definitions to improve reporting consistency and stakeholder communication.

Certifications

- Module 1: Python and SQL Fundamentals – Edureka
- Cisco Data Analytics Essentials – Cisco
- Introduction to Packet Tracer – Cisco

Leadership & Activities

Rajyapuraskar Awardee – Bharat Scouts & Guides

Recognized for leadership, teamwork, discipline, problem-solving, and responsibility through successful coordination of community service and team-based initiatives.

Personality Development Program – Aspire, Akola

Completed structured training focused on professional communication, presentation skills, interpersonal effectiveness, teamwork, customer interaction, and workplace professionalism.
